To whom it may concern,

I am a Dominion customer and want a public hearing on Dominion's long-term resource plan. This is a 10-year plan that will have a profound effect on me and the general public of South Carolina for decades (if not centuries) to come in multiple ways including:

- Increased cost on consumers like myself due to the delay of closing coal-burning generating plants which require costly upgrades and eventually, costly clean-ups following their closure.
- Increased risk of exposure to climate change impacts due to the lack of efforts towards energy efficiency or increased resilience in our power grid (responsible electricity demand management).
- Increased costs related to rising gas prices as a result of increased investment in gas-fired plants such as the proposed large gas-fired plant with Santee Cooper.

Please schedule a public hearing and add me to your notification lists regarding the long-term resource plan.

Best,
